Mobility Services

TeamLogicIT®
Your Technology Advisor

Mobility services from TeamLogic IT address the multitude of challenges being faced by companies today. From field representatives and business travelers to multiple office locations, the information you need can be accessed anytime, anywhere. Yet, the proliferation of employee-owned mobile devices in the workplace, along with the growing array of company-owned mobile devices makes it increasingly difficult for companies to enable mobile access to corporate data while ensuring IT compliance, security and administrative efficiency. It's critical to have appropriate mobile support in place to mitigate risk at your company.

Reap the benefits of increased productivity and improved cost control with mobility services from TeamLogic IT. Our solution is aimed at securing mobile devices and data on the devices, whether they are company-owned or employee-owned and incorporates mobile use policy initiatives, mobile device management (MDM), mobile application management (MAM), and bring-your-own-device (BYOD) management to enforce your security policies.

Ensure your mobile devices support your business, not jeopardize it. Our mobilityservices cover these key areas:

- **Use Policy:** We assist with developing a mobile use policy and identifying and deploying the technology to support it.
- **Mobile Device Management:** Our services are focused on managing, monitoring and securing devices.
- **Mobile Application Management:** TeamLogic IT can monitor, push and block apps installed on all devices and enforce app compliance policies.
- **BYOD:** We help you navigate the technological, management and social challenges bring-your-own-device creates in the workplace.

Move forward with **The Color of Confidence**®

PEACE OF MIND FOR YOUR BUSINESS

TeamLogic IT provides a powerful solution for managing mobile devices integrated with management of the rest of the IT infrastructure (PCs, servers, networks, etc.). You get maximum IT efficiency with easy and fast administration as part of our managed IT services offering.
