

Server Installation and Support

Our server installation and support services are focused on keeping your business humming—meeting the network demands of today while planning for tomorrow. Whether building a new office computer system from the ground up or reconfiguring an existing one to accommodate growth and offsite locations, we have access to the latest technologies to connect you with the right network solution.

NETWORK DESIGN

A well-designed computer network will help minimize computer and network problems that can negatively impact productivity. Like a tuned-up engine, all components of your network must work optimally and together. Servers, desktop workstations, cables, switches, routers, etc., we have the knowledge and expertise to build your IT network with the right parts. We make sure your systems are proficient enough to accomplish your tasks, without being more than you need by designing a system that is scalable enough to grow with your business.

IT RELOCATION AND SETUP

We safely disconnect, store, transport, and then reconnect your computers, printers, phones and faxes saving you and your employees time, money and effort while maintaining productivity. Whether you want to move un-racked servers across the street, or de-install and reinstall your entire IT network system across the country, our engineers and logistics experts understand how valuable your business' data assets are and operate with the utmost sensitivity to your timeline.

Move forward with **The Color of Confidence®**

SERVER INSTALLATION AND SUPPORT

TeamLogic IT's services include:

- **File and Print Servers:** *It's important that your employees have access to the data they need when they need it. With our server installation and support services we organize file sharing and printer usage so that your business operations run smoothly.*
- **WAN and VPN:** *Wide area networks and virtual private networks are important for today's global and remote business environments. We help ensure your employees can access their work files conveniently and securely.*
- **Purchasing and Installation:** *Our strategic partnerships and nationwide buying power means we can typically save you money on a wide range of equipment. And, when you buy from us, we will also provide full installation of all hardware, software and peripherals.*
- **Cabling:** *Our cabling services help you avoid cable clutter, building code violations and fire hazards. It's likely the largest and most complicated portion of a network server installation, but our technicians make sure even the relatively invisible footprint of your cabling is properly installed and diligently organized. They are trained to neatly install, store and label cables so they can be easily identified should a problem arise.*
