

# Managed AI Services

Empowering Businesses to Use AI Securely and Productively

TeamLogic IT understands that every business is at a different point in its AI journey. Our managed AI services are designed to meet you wherever you are to help you move forward with clarity and confidence. Our approach ensures responsible, results-driven AI adoption with secure configuration and deployment backed by training, security and business alignment.

Successful AI adoption begins with a clear plan. First, evaluate where AI can add the most value in your organization—whether it's streamlining internal processes, enhancing customer experiences or uncovering new insights from data. Next, assess your current technology environment and data readiness to ensure you have the right foundation. It's also important to prepare your people through training and to put security measures in place before deploying AI widely.

TeamLogic IT can guide you through each step of this journey with these services tailored for AI enablement:

- **AI Readiness Assessment:** Identify your organization's starting point by uncovering gaps, opportunities and risks before you deploy AI.
- **Business Discovery Workshops:** Pinpoint high-impact AI use cases across your operations, marketing, sales, HR and more—aligned to your business goals.
- **Security and Data Governance Planning:** Implement responsible-use policies, data safeguards, and compliance controls so AI is adopted securely.
- **End-User Training and Enablement:** Equip your staff with the skills to use AI tools effectively (e.g., Microsoft Copilot, ChatGPT, Google's Gemini, Anthropic Claude) and confidently embrace AI in their daily work.
- **AI Assistant Enablement:** Help you create custom AI agents or assistants tailored to your business—to automate tasks, generate insights and accelerate workflows in ways that set you apart.

Whether you're just curious about AI or already applying it, TeamLogic IT can help you move forward with confidence. With our nationwide network of IT experts and deep cybersecurity experience, we ensure your AI adoption is productive, protected and purposeful.

Contact us to schedule an **AI Readiness Assessment**, and let's turn your AI potential into real business outcomes.

## THE POWER OF AI

AI is a new wave of technology that provides operational efficiency and competitive advantage for your business.

What can AI do for you?

- *Identify growth strategies and new markets*
- *Create business efficiencies*
- *Provide operational insights*
- *And more...*

## SECURITY AND PRIVACY

Security and privacy are top concerns when adopting any new technology. You can embrace AI responsibly with the right approach.

Here's how to leverage AI safely in your business:

- *Choose secure AI tools*
- *Protect sensitive data*
- *Set clear policies*
- *Train your team*

With strong security, data governance and training in place, AI can be used confidently. TeamLogic IT helps put these safeguards in place so you can innovate without compromising security or compliance.

## WHY TEAMLOGIC IT?

- *Two decades of experience in managed IT services*
- *Microsoft and AI partnerships*
- *Secure LLM support without compromising security*
- *National reach, local support through more than 300 offices to serve all your business locations*

**Protect your business today.
