Cloud Services Readiness Assessment

TeamLogic IT®
Your Technology Advisor

A TeamLogic IT cloud services readiness assessment will determine if your business has the bandwidth, reliability and security to access cloud services. We review your applications, data and infrastructure and recommend strategies for cloud migration.

The cloud readiness assessment looks at your network bandwidth, security, applications, data and procedures to identify areas that might need improvement or remediation. We take the results of this assessment and will develop a plan to resolve any identified exposures. We will then outline ongoing managed IT services that assume your business is ready for the cloud.

Your cloud readiness assessment will consist of the following elements:

- **Cloud Risk Report:** This executive-level report includes a proprietary Cloud Risk Score covering Azure AD and the Microsoft 365 services along with summary charts, graphs and an explanation of the risks found in the security scans.
- **Mobile Policy Assessment Report:** A detailed review of the mobile policies that are in place on both company-owned and BYOD devices.
- **Network Assessment Report:** Comprehensive assessment of all networked devices with consideration for security and bandwidth constraints.
- **Compliance Review:** Considers industry and regulatory compliance requirements for your business. Evaluates potential risk, exposure and fines that could impact the livelihood of your business.
- **Microsoft Cloud Security Assessment:** Includes your own Microsoft Control Score and Secure Score from Microsoft and also shows your trend against industry benchmarks.

Move forward with **The Color of Confidence**®

ESSENTIAL CLOUD SERVICES

- *M365*
- *SaaS Protection*
- *File Sync and Sharing*
- *Cloud Monitoring*

POPULAR CLOUD SERVICES

- *Cloud Backup*
